

Price List of the Most Commonly Restored Leather Items

The following sets forth Bibbentuckers' typical price ranges of the most commonly cleaned leather items. *Please note that these prices are for general leather, colors and processing requirements; additional charges will apply for fancy trims and buttons that require special care or handling.*

Cleaning leather is different than cleaning a fabric garment. Each leather piece is uniquely made and requires its own special solutions and processes depending on its construction, leather type, finish and color. Bibbentuckers' professional leather care includes careful restoration of color and texture that can be lost as a natural consequence of the cleaning process. The prices listed below are base range guidelines. The actual price charged is determined by the cleaning requirements of each individual piece.
